Manway Door Gaskets for Various Storage Tanks and Tankers

The following series of cross-section configurations are generally the more widely used manway door gaskets. We can provide most of the older styles, “no name” tank styles or styles that are now obsolete by the original manufacturer.

To order your required gasket(s) you can send us a sample or check the shape of the gasket(s) and advise us of the dimensions (ID x OD and thickness), colour and any other information you might be able to supply, such as your tank’s make, size, model and capacity.

Manway Door Gaskets:
